

Award-Winning Technology

The CBRE Supplier Partner Innovation Challenge was an annual event led by CBRE, a global leader in commercial real estate services and investment. The challenge aimed to recognize service providers in CBRE's supply chain who demonstrated innovation and best practices. Participants were invited to submit innovative ideas, new ways of working, and best-in-class client solutions that would help companies create healthier workplaces for their employees and improve the workplace experience while addressing significant cost pressures. The submissions were evaluated by three groups of company leaders and subject matter experts across three separate rounds of competitive voting. The submissions were ranked based on their ability to ensure a healthier workplace, give employees peace of mind as they re-enter the workplace, provide touchless controls and enhanced sanitation, reduce costs, improve service quality, and utilize predictive analytics and sensor technology to deliver data-driven solution optimization. Out of 54 companies in the process, in the first time of the history of the award, one company won all 20 categories;

BioSafe by BioSecurity Technology.
